

Smoke signals

A new breed of Indian have emerged onto the plains . The 2010 red Indians look like they will be a forced to be reckoned with. The two other teams will be heard to say Custers famous quote of 'what Indians". This they will find to be at their own peril. This year's team has a strong mix of experience and youth.

There is a noticeable lifting of ability and standards in the tour this year. All teams will be looking forward to the 1st encounter in the pool.

Naturally we think we will have the wood on them.

Figure 1 **2010 Red Indians**

Captain Fantastic

It was decided tonight after some serious deliberations that Isaac Foote would be team captain for the Red Indians. Isaac brings a number of strong leadership qualities to our team including a strong desire to win mixed with a good dose of humour. Isaac was an easy choice as he was already filling the role of team clown and has naturally progressed into the captain's role. I spoke to Isaac afterward and he commented that he was really looking forward to leading a team that was clearly superior in all facets required to dominate the upcoming Tri-Series. Isaac believes that the Red Indians combination of both all around talent in the water coupled with the strong bond within the squad will be too much for the clearly overmatched Concords and Smurfs

Just a reminder that friends and whanau can send well wishes and salutations
